

Lab sheet 5.5: ElseIf Clauses

FICA Tax

Instructions:

Textbook Chapter 5, page 437-438

Requirement:

1. Enter the first number in the txtToDate textbox.
2. Enter the second number in the txtCurrent textbox.
3. Click the “Calculate FICA Taxes” button.
4. The result is displayed in the grey textbox.

The screenshot shows a Windows-style application window titled "FICA Taxes". Inside the window, there are three input fields and one button. The first input field is labeled "Total earnings for this year prior to the current pay period:" and contains the value "1234.67". The second input field is labeled "Earnings for the current pay period:" and contains the value "543.21". Below these fields is a button labeled "Calculate FICA Taxes". At the bottom of the window, there is a grey output field labeled "FICA taxes for the current pay period:" which displays the result "HK\$41.56". Three external labels with arrows point to these specific components: "txtToDate textbox" points to the first input field, "txtCurrent textbox" points to the second input field, and "txtTax textbox" points to the grey output field.

Field Label	Value
Total earnings for this year prior to the current pay period:	1234.67
Earnings for the current pay period:	543.21
FICA taxes for the current pay period:	HK\$41.56
